

## FLORIDA REGION OF USA VOLLEYBALL, INC.

August 1, 2009

Club Directors,

It's that time of the year again as we are gearing up for a new season. This season will be one of learning for all of us. When we get the new rule changes updated, you will see why.(still waiting on USAV to update their website).

And speaking of rules, please remember it is your responsibility that all of your coaches and junior players get the officials clinic they need to be certified for the upcoming seasons. Rules are now updated on a 2 year cycle so we will now only need to train just the new coaches and players if they come on for 2010-11 .We again will provide the means for you to train your players and coaches. This must be done prior to your first tournament or January 31, whichever is first.

If you don't feel what we provide is adequate of you prefer another method, we can conduct a clinic like we have in the past. You will be responsible for the fees for said clinicians (\$150 for head clinician and \$125 for assistant). Those dates need to be coordinated thru the officials chair or the region office. NO official should solicit doing a live clinic for you. I also need to know if this occurs.

If you do have a request for a live clinic and want a certain person, that normally can be arranged, but please go thru myself or the Region Office.

If you have any questions or suggestions, please contact myself or the region office.

Thanks,

Michael Gale

Florida region Official's Chair
